Kinetic Sand!

MATERIALS

- Cornstarch
- 2 tablespoons dish soap
- Water
- 1 packet 500 g salt
- Food coloring
- 1 bowl
- 1 cup
- Glitter

LET'S DO IT?

Step 1: Put the packet of salt in a bowl.

Step 2: Add 4 tablespoons of cornstarch and mix them up.

Step 3: In a cup of water, add 2 tablespoons of dish soap and some drops of food coloring. Put the mixture into the bowl and mix it all up with your hands.

The best part of making kinetic sand is playing with it afterward!

OK, time to play! You can mold and shape the sand the way you like, as if you were at the beach!
